A new beauty read called "Beautiful Skin Revealed" has hit my desk that I thought I should share.

[Beautiful Skin Revealed](#) is a new book by Dr. Paul Frideman that aims to separate fact from fiction on the latest trends, techniques and techniques on how to get beautiful skin. Dr. Paul M. Friedman is a noted dermatologist who has developed many groundbreaking laser techniques

This easy to read book gives a firsthand account of real patients whose lives were changed through small dermatological procedures.

An engaging mix of insider tips and the science behind common skin problems such as: wrinkles, age spots, and acne are told through personal stories which show these conditions can be corrected and even eliminated.
